## Hello and Welcome

Today we have thoughts from John  
our PiCC United board member.

## Finding My Voice as a Patient – And How You Can Too

For a long time, I wanted to get involved as a patient—share my experience, learn more, maybe even help others—but I honestly didn't know where to start. Life is busy, and between appointments, work, family, and everything else, I kept putting it off.

That changed when I found out about PiCC-United and the amazing community of patients just like me—people who care, who listen, and who believe our voices matter. The best part? There's no pressure. I can do as much or as little as I want, and every small step still helps make a difference.

Whether it's joining a conversation, filling out a survey, or just showing up—each action helps shape better care and helps all of us take more ownership of our health. Being part of this community has given me confidence, hope, and a real sense of purpose. If you've ever wondered how to get involved, this is a great place to start.
